- **Core Competencies:** Full Stack Web Development, AI Application Development, MERN Stack, AI Tools & NLP, Backend Architecture

PROJECTS

CareerZyra AI — AI-Powered Career Assistance Platform

- Built a full-stack AI career platform with an ATS-friendly resume builder and AI-based resume analysis against job descriptions.
- Developed an AI mock interview module with real-time answer evaluation and webcam-based monitoring.
- Added personalized job recommendations and a responsive glassmorphism UI across devices.

JARVIS — AI Virtual Assistant

- Built an AI virtual assistant with voice command processing and natural language understanding.
- Integrated OpenAI's ChatGPT API for conversational responses, plus real-time weather, news, and system control.
- Used Supabase to store conversation history in a Python-based desktop application.
